Documentation:

Detailed Annotation and explainnation shows in Project.

See JavaDoc file in CarConfigurationServer/doc/ and CarConfigurationClient/doc/

Explanation of Test Run:

Main method stays in CarconfigSocket class in client project.

Main method stays in CarconfigServer class in server project.

CarconfigSocket class extends DefaultSocketClient in both client and server project, which override the handleSession function and process the input from both the server and stdIn.

Follow the exact instruction from the console.
